1. Claims 1-51 have been presented for examination.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-11, drawn to design data generating apparatus/method utilizing transformation of

allocated shapes, classified in class 703, subclass 1.

II. Claim 12-51, drawn to design data generating apparatus/method utilizing transformation of

allocated shapes by movement of edge lines as well as cross sectional shape analysis, classified in

class 703, subclass 1.

Inventions listed in Groups 1-II above are directed to related with respect to the execution of probabilistic

distribution estimation. The related inventions are distinct if the (1) the inventions as claimed are either not capable

of use together or can have a materially different design, mode of operation; function, or effect; (2) the inventions do

not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See

MPEP § 806.05(j). In the instant case, the inventions as claimed require distinct shape transformations and analysis

in order to implement the grouped claims.

Group I requires a nodal shape transformation using boundaries and regions, Group II requires nodal shape

transformation using cross-sectional shapes as well as similarity like transformations.

The claims would require distinct searches in order to encompass the distinct and different shape

transformations and analysis. Furthermore, the inventions as claimed do not encompass overlapping subject matter

with respect to the transformations and analysis employed and there is nothing of record to show them to be obvious

variants. Because these inventions are independent or distinct for the reasons given above and there would be a

serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in

the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/812,935 Page 3

Art Unit: 2128

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Saif A. Alhija whose telephone number is (571) 272-8635. The examiner can normally be reached on M-F, 11:00-7:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kamini Shah can be reached on (571) 272-2279. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300. *Informal or draft communication, please label PROPOSED or DRAFT*, can be additionally sent to the Examiners fax phone number, (571) 273-8635.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
